

Which animal might like to eat a fish out of a river flowing into Lake Superior?

American Black Bear

Lion

Did you know?

American Black Bears like to eat fish. They may catch a salmon in a river running into Lake Superior.

Black bears are excellent tree climbers. They will run up a tree if they are frightened.

They also like to eat plants, fruits, nuts, bugs, and honey. Is there something that bears eat that you would not like to eat?

In our area bears hibernate all winter. That means that they find a nice, cozy place to spend a couple of months sleeping.

Baby bears are born while their mother is hibernating! She wakes up enough to take care of them. They stay with their mom until they are 1 ½ years old. How long do you stay with your Mom?

(The other animal in the picture is a lion. Lions live in Africa.)

Which water loving bird might you see around
Lake Superior?

Canada goose

Flamingo

Did you know?

-Right now, the Canada goose is migrating. That means that they are gathering in groups and are getting ready to fly to a place where the water is not frozen. Peak migrations happen in our state between October and November.

-Do you know which letter they like to make when they are flying? Flocks of geese fly in a v-shaped group and some will travel non-stop for up to 16 hours! How many hours are you at school?

-When they are migrating they can fly up to 70mph. That is faster than your car when it is on the highway!

-While they are migrating they will stop and rest along the way and eat grass and grain.

Does the water from Lake Superior taste salty or does it taste like the water out of the drinking fountain?

Did you know?

Lake Superior is called a freshwater lake because the water is not salty. The city of Superior gets some of its drinking water from Lake Superior. Oceans taste salty and the water that is in the oceans is called saltwater.

Lake Superior is the largest fresh water lake in the world!

Some people think that the shape of Lake Superior looks like the head of a wolf. Can you see that on the map?

Which animal lives in Lake Superior?

Whale

Did you know?

Walleye is a member of the Perch family of fish.

They have teeth!

Their bodies are covered with scales that feel like sandpaper.

Walleyes are predators. That means they eat other animals.

They like to eat at night. The scientific word for that is nocturnal.

Do you like to eat walleye?

The other animal pictured is a whale. They live in the oceans.

Which animal lives near us and
Lake Superior?

Zebra

White tailed deer

Did you know?

The white tailed deer lives near us.

The boys are called bucks and the girls are called does.

Each winter the bucks shed their antlers and they have to grow new ones!

A deer usually weighs as much as 3 or 4 of you!

Deer like to eat leaves and twigs and sometimes the plants in your yard. 😊

(The other animal is a zebra. They live in Africa.)
